Special Issue Title:

*Gynecological and Pelvic Surgery*

Dear Colleagues,

*Clinical and Experimental Obstetrics & Gynecology* (ISSN 0390-6663) is an international, scientific, open access journal on Gynecology, Obstetrics, Fetal Medicine, Gynecological Endocrinology and related subjects (Fertility and Sterility, Menopause, Uro-gynecology, Ultrasound in Obstetrics and Gynecology, Sexually Transmitted Diseases and Reproductive Biological Section). CEOG is covered by ISI Journal Master List, Index Copernicus International, Science Citation Index Expanded, Current Contents - Clinical Medicine, Web of Science, EMBASE Excerpta Medica, MedSci, Pubget, Genamics JournalSeek, Sciencescape, Unbound Medicine, and PubFacts.com, with a Web of Science impact factor of 0.139 in 2019 and on an increasing trend. I accepted to be a Guest Editor for the Special Issue “Gynecological and Pelvic Surgery” of *Clinical and Experimental Obstetrics & Gynecology*, a valuable journal, which deadline is planned for the autumn of 2021 and I invite all of you to bring your scientific contribution in gynecological and pelvic surgery.

Gynecological and pelvic diseases often raise challenging diagnostic and management issues. The surgeon or the gynecologist is often faced with difficult decision-making situations, especially in emergency conditions. Radical cancer surgery ensures the best survival rates. Either in classical, laparoscopic or robotic surgery, the goals of surgeons are to ensure the lowest possible rate of complications using the less invasive method. Interdisciplinarity and cooperation between gynecologists, urologists and general surgeons proved to be essential in some diseases like neoplasys and endometriosis. The defined scope of the topic for this special issue is to establish modern protocols in diagnosis, treatment and management of gynecological and pelvic diseases.
